**Greenhouse gases make the Earth get warm
And acid rain is fallin' from the sky
Ozone's depleting and the chemicals are leaching
While the litter is accumulating high**

**Now pollution affects all the parts of the Earth
On the ground, in the water, and the air
And it's up to you and me to realize what it's worth
And begin to act and show that we care**

**Save the Earth (Save the Earth) – Save the Earth (Save the Earth)
Be pro-active, that's the key
If you're thinkin' globally and then you're actin' locally
The planet will get better – you will see!**

**Now what can I do? How can I help?
I'll reduce all the energy I waste
Re-use some things and Recycling will bring
A difference in the world that I can make!**

**Everything we use and eat and drink and make and wear
It requires en-ergy
By conserving our resources and learning how to share
It'll help with our community.**

**Save the Earth (Save the Earth) – Save the Earth (Save the Earth)
Be pro-active, that's the key
If you're thinkin' globally and then you're actin' locally
The planet will get better – you will see!**

The planet will get better – you will see!

The planet will get better – you will see!
