**Greenhouse gases make the Earth get warm  
And acid rain is fallin' from the sky  
Ozone's depleting and the chemicals are leaching  
While the litter is accumulating high**

**Now pollution affects all the parts of the Earth  
On the ground, in the water, and the air  
And it's up to you and me to realize what it's worth  
And begin to act and show that we care**

**Save the Earth (Save the Earth) – Save the Earth (Save the Earth)  
Be pro-active, that's the key  
If you're thinkin' globally and then you're actin' locally  
The planet will get better – you will see!**

**Now what can I do? How can I help?  
I'll reduce all the energy I waste  
Re-use some things and Recycling will bring  
A difference in the world that I can make!**

**Everything we use and eat and drink and make and wear  
It requires en-ergy  
By conserving our resources and learning how to share  
It'll help with our community.**

**Save the Earth (Save the Earth) – Save the Earth (Save the Earth)  
Be pro-active, that's the key  
If you're thinkin' globally and then you're actin' locally  
The planet will get better – you will see!**

**The planet will get better – you will see!**

**The planet will get better – you will see!**
